

INNOVATE **BHARAT** HACKATHON 2026

INNOVATING TODAY FOR A SUSTAINABLE TOMORROW

10TH-11TH APRIL, 2026

**VENUE: EXPERIENTIAL LEARNING CENTRE, BLOCK 45,
SHARDA UNIVERSITY, GREATER NOIDA**

Hosted By:

Sharda University, Greater Noida

Sharda School of Computing Science & Engineering

ABOUT THE EVENT

Sharda University is organizing **INNOVATE BHARAT** – Hackathon 2026, a national-level innovation platform designed to encourage students, researchers, and technology enthusiasts to develop cutting-edge solutions for real-world challenges. The hackathon is aligned with the vision of building a sustainable, technologically empowered, and innovation-driven nation.

The event promotes interdisciplinary collaboration and encourages participants to develop practical solutions using emerging technologies. It serves as a platform to nurture creativity, strengthen research culture, and promote startup and entrepreneurial thinking among students and professionals.

VISION: - Innovate Bharat Hackathon 2026 aims to nurture socially responsible technologists who can design intelligent, secure, and sustainable solutions to accelerate India's transformation into a Viksit Bharat by 2047.

OBJECTIVES OF THE EVENT

- To promote innovation and creative problem-solving skills
- To encourage development of sustainable and scalable technological solutions
- To provide exposure to real-world industry and societal challenges
- To strengthen academia–industry collaboration
- To foster startup and entrepreneurial mindset among participants
- To enhance hands-on skills in emerging technologies
- To support national initiatives such as Digital India, Smart India, and Sustainable Development Goals

EXPECTED OUTCOMES OF THE EVENT

- Development of innovative prototypes and real-time solutions
- Identification of potential startup ideas and incubation opportunities
- Improved technical competency and industry readiness of participants
- Strengthening research and innovation ecosystem
- Solutions addressing social, environmental, and economic challenges
- Increased collaboration among students, faculty, researchers, and industry experts
- National-level recognition for innovative ideas and technical excellence

EVENT TRACKS

Hackathon Themes / Tracks

Track 1: AI and Intelligent Systems

Track 2: Web, App and Software Innovation

Track 3: Cybersecurity and Blockchain

Track 4: Data Science and Smart Analytics

Track 5: Social Impact and Smart India Solutions

Track 1: AI and Intelligent Systems

This track emphasizes the design and development of intelligent, adaptive, and autonomous systems using Artificial Intelligence to solve complex real-world problems. Participants are encouraged to leverage machine learning, deep learning, NLP, computer vision, and intelligent automation to enhance efficiency, inclusivity, and decision-making.

Problem Statement: AI-Driven Solutions for Smart and Inclusive India

Sub-Tracks

- AI for Healthcare & Well-Being
- AI for Education & Skill Development
- AI for Agriculture & Rural Development
- AI for Smart Cities & Governance

Challenge

Design and develop an AI-based intelligent system that:

- Automates or optimizes real-world processes.
- Uses machine learning, NLP, computer vision, or intelligent agent
- Supports inclusivity through regional languages and adaptive interfaces
- Provides predictive or recommendation-based outcomes

Expected Outcome:

An AI-powered prototype that improves efficiency, accessibility, or service quality, contributing to SDG 3, SDG 4, SDG 9, and SDG 10, and supporting the Viksit Bharat @2047 vision

Track 2: Web, App and Software Innovation

This track focuses on end-to-end software development, including web platforms, mobile applications, and enterprise systems that address real-world challenges through scalable, secure, and user-centric digital solutions

Problem Statement: Digital Platforms for Next-Generation Bharat

Sub-Tracks

- Citizen-Centric Digital Platforms
- EdTech, Health Tech & Fin Tech Solutions
- Startup & MSME Enablement Software
- Cloud-Native and SaaS Applications

Challenge:

Develop a web-based, mobile, or software solution that:

- Solves a real-world problem in governance, education, healthcare, business, or public utilities.
- Ensures seamless UI/UX with multilingual support.
- Integrates APIs, cloud services, or microservices.
- Is scalable, secure, and user-centric.

Expected Outcome:

A robust digital application that enhances service delivery, productivity, or citizen engagement, aligned with SDG 9, SDG 11, and SDG 16.

Track 3: Cybersecurity and Blockchain

This track addresses the need for secure, transparent, and resilient digital ecosystems. Participants will explore cyber defense mechanisms, cryptography, privacy preservation, and blockchain-based trust systems.

Problem Statement: Secure, Transparent and Trusted Digital Ecosystems

Sub-Tracks:

- Cyber Threat Detection & Prevention
- Data Privacy and Digital Identity
- Blockchain for Governance & Public Records
- Blockchain for Finance & Supply Chain

Challenge:

Create a cybersecurity or blockchain-based solution that:

- Protects digital systems from cyber threats.
- Ensures data integrity, privacy, and authentication
- Uses blockchain for secure records, smart contracts, or decentralized systems.
- Enhances trust in digital transactions and public services.

Expected Outcome:

A secure and resilient digital framework or prototype supporting SDG 9 and SDG 16, strengthening India's digital trust ecosystem.

Track 4: Data Science and Smart Analytics

This track encourages participants to transform raw data into actionable insights using data science, analytics, visualization, and predictive modeling to support sustainable development and strategic decision-making

Problem Statement: Data-Driven Insights for Sustainable and Smart Bharat

Sub-Tracks:

- Urban & Infrastructure Analytics
- Economic & Policy Analytics
- Environmental & Climate Analytics
- Business Intelligence & Decision Support

Challenge:

Develop a data science and analytics solution that:

- Collects, cleans, and analyzes structured or unstructured data.
- Applies statistical models, predictive analytics, or visualization techniques.
- Provides actionable insights for decision-makers.
- Addresses challenges in sustainability, urban development, economy, or public welfare.

Expected Outcome:

A smart analytics platform that supports evidence-based decision-making and sustainable development, aligned with SDG 8, SDG 11, SDG 12, and SDG 13

Track 5: Social Impact and Smart India Solutions

This track focuses on technology-driven social innovation that addresses grassroots challenges and supports inclusive, ethical, and sustainable development.

Problem Statement: Technology for Inclusive Growth and Social Transformation

Sub-Tracks:

- Rural Development & Digital Inclusion
- Women Empowerment & Child Welfare
- Waste Management & Environmental Protection
- Assistive Technologies & Accessibility

Challenge:

Design a technology-enabled solution that:

- Solves a pressing social or community problem.
- Uses CSE tools such as apps, AI, IoT, or data platforms.
- Is cost-effective, easy to adopt, and scalable.
- Demonstrates measurable social impact.

Expected Outcome:

A socially impactful solution that promotes inclusive development and community empowerment, contributing to SDG 1, SDG 5, SDG 10, and SDG 17, and supporting the Smart India & Viksit Bharat vision

Event Details

Event Dates: April 10-11, 2026 (10:00AM to 10:00AM)

Venue: Experiential Learning centre, SSCSE, Sharda University, Greater Noida

Registration Amount: Rs.500 /- per team (minimum 2 & max 6 in team)

Event Timeline:

Registration Opens: February 14, 2026

Idea Submission Deadline: March 14, 2026

Online Technical Evaluation (Screening): March 16-18 March, 2026

Grand Finale: April 10, 2026 (10:00 AM) - April 11, 2026 (12:00 Noon)

Prizes and Rewards

Total Prize Worth

₹**2** LAKHS

Second Prize

₹**50k**

Top Prize Money

₹**1** LAKH

Third Prize

₹**25k**

5 Consolation Prize for each Theme : 5000/ each for each track

Rubric Form for Hackathon -2026

	Parameters	Level (3)	Level (2)	Level(1)
A.	Idea-Interesting/ Useful/ Value Accretive/Impact Focus/Novelty/Theme Specific	The Idea/Solution is interesting and useful, with clear steps. Also has a Strong impact focus or strong value creation with a unique problem tackling	The Idea/Solution is interesting and useful	The idea does not seem interesting, useful and not unique.
B.	Identification of Necessary Tools/ Latest Technology	Accurately identifies all additional information and tools/formulas needed to solve the problem.	Accurately identifies some additional information and tools/ formulas needed to solve the problem.	Does not identify additional information or tools/formulas needed.
C.	Level of impact, Scalable	Idea is impactful and scalable which helps to solve the related issues to a major level	Solves the problem to a good level	Doesn't add much value to the solution of the problem, not scalable
D.	Financial Sustainability	Solution can be implemented with external finance	Business model can be improved to make the solution more affordable	Solution can be implemented but is not financially sustainable
E.	Technical Feasibility	The idea is technically feasible and can be implemented	The idea is technically feasible but there may be significant challenges	The idea does not seem to be technically feasible
F.	Communication (Presentation)	Appropriate use of technology during presentation (where relevant). Presentation of project work is clear and well- organized. Responds to questions in a poised, articulate, and professional manner.	Answers to few questions incomplete; needs occasional assistance from project advisor.	Unable to respond effectively to questions posed by committee members.

Student Guidelines (Must Follow)

1. All participants must remain inside the campus for the full 24-hour duration.
2. At least **one team member must be present at the project desk at all times**
3. Students are **not allowed to leave the venue** except in case of emergency.
4. Participants may take **short nap breaks** in the designated rest area.
5. Misconduct, indiscipline, or violation of rules may lead to disqualification.

Facilities Provided to Participants

1. 3-time meals during the hackathon.
2. Hostel stay facility for participants from outside the campus.
3. Snacks, tea/coffee will be available at intervals.
4. Resting/Nap room arrangements.
5. Participation certificate for all shortlisted finale teams.

STEERING COMMITTEE

Chief Patron(s)

Shri Pradeep Kumar Gupta - Hon'ble Chancellor, Sharda University

Shri Yatendra Kumar Gupta - Hon'ble Pro Chancellor, Sharda University

Shri Prashant Gupta - CEO- Sharda University

Patron(s)

Prof.(Dr.)Sibaram Khara - Hon'ble Vice Chancellor, Sharda University

Prof.(Dr.) Parma Nand - Hon'ble Pro Vice Chancellor, Sharda University

Co Patron

Prof.(Dr.) Geetha G – Dean ,SSCSE , Sharda University

Chief Convener(s)

Prof. (Dr.) Sudeep Varshney– Head , Department of CSE , Sharda University

Dr.Rajneesh Kumar Singh– Head , Department of CSA , Sharda University

Convener(s)

Dr. Pushpendra Kumar Rajput – Dy.Head , Department of CSE , Sharda University

Prof.(Dr.)Sandeep Gupta - Professor , Department of CSE , Sharda University

Prof.(Dr.)Jayant Shekhar- Professor , Department of CSE , Sharda University

Organizing Secretaries

Prof. (Dr.) Ambuj Agarwal - Professor, Department of CSE , Sharda University

Dr. Gaurav Raj –Associate Professor, Department of CSE , Sharda University

Dr. Amrit Kumar Agarwal, Associate Professor , Department of CSE , Sharda University

Dr. Abhishek Singh Verma, Associate Professor, Department of CSE , Sharda University

Mr. Amit Kumar Upadhyay, Assistant Professor, Department of CSE, Sharda University

ADVISORY BOARD

Prof.(Dr.) R.C.Singh – Dean Academics , Sharda University

Prof.(Dr.) Bhuvnesh Kumar – Dean Research , Sharda University

Prof. (Dr.) Karthikeyan Natesapillai – Director IQAC , Sharda University

FAQ

1. Who can participate?

-Students of B.Tech and all bachelor degree programs.

2. What is the team size?

-2–5 members recommended.

3. Is the hackathon online or offline?

-The Grand Finale is fully on-site (offline) at Sharda University.

4. What is the evaluation basis?

-Innovation, feasibility, technical depth, impact, and demonstration quality.

5. Will Wi-Fi be provided?

-Yes, Wi-Fi access will be arranged, though teams may use personal hotspots.

6. What should teams bring?

-Laptops, chargers, stationery, ID cards, and personal essentials.

7. Will accommodation be provided?

-Yes. Hostel stay is available
